September – Peace pace

Crystal clear air fills your lungs, your eyes resting on blue sky over flaming autumn colours in shrubbery and bushes. The lake of Bygdin mirroring the blue, blue mountains – and you just being your own self in the middle of this greatness. Reload, gather strength, talk with your inner self while climbing a mountain, read a book, admire the views, enjoy a cup of hot chocolate in front of the fire place and look inwards while observing the dancing flames.

Stay with us from Sunday until Thursday, and we offer one night free of charge.

Accessible with bus from Oslo Airport Gardermoen to Tyinkrysset/Tyin, and from there organized transport onwards to Fondsbu.

Winter magic – March and April

The magic of **the sound of silence** is available in a calm winter day without wind. The absence of sound is pure luxury in our busy, noisy fragmented world of today. Here you can ski flat, steep, on marked routes or back country. You can be out for an hour or for the whole day – and you will always come back inside loaded with freshness and new energy. We always have snow, and the atmosphere is very international in the winter season. The magic of **the northern light** might appear. **Magic meetings and deep meaningful conversations** will also be a part of your stay. We do not have road connection in the winter, which makes the place rather exotic and this is part of the magic.

Stay with us from Sunday until Thursday, and we offer one night free of charge.

Accessible with bus from Oslo Airport Gardermoen to Tyinkrysset, and from there snow coach onwards to Fondsbu.
